## IZYAPI BUILDING MATERIALS

Having started to produce plumbing materials from plastic and metal raw materials in 1997, our company has been adapting to the innovative structure of the sector by expanding its product range and production capacity with the investments it made in 2007. The complementary materials of the leading companies producing the world's leading ceramics and sanitary ware are one of the main specialties of İz Yapı and it has become one of the leading companies of this industry all over the world.

Our company manufactures various plastic and metal processing molds in its own high-tech mold processing machines with its experienced technical staff. Thus, we make original designs in line with the demands of our industry and present them to the use of valuable business partners.

Today, our company is exporting to 53 countries all over the world including 25 European countries as well as to be found in many sales points and all DIY markets in Turkey. We are able to produce over 450 different types of products by processing over 1000 tons of raw material per year in a 8500 m<sup>2</sup> closed area with 17 injection machines and many different moulds, we keep serving the best quality for our valuable customers.
